

**REMARKS/ARGUMENTS:**

Applicant cancels all claims pending in the application and submits the new claims 32 - 36 to incorporate the features of original independent claim 1 and more precisely reflect the features depicted in Figure 2 of the application. New dependent claims 37 and 38 have been written to add two features disclosed in the original specification and drawings to the elected species B. They do not create a new species.

Applicant respectfully requests that a timely Notice of Allowance be issued in this case.

10 Sincerely,

Jonathan R. Smith
